MIDDLE SCHOOL EDUCATION SERIES

Drive Your Bike!

LEVEL ONE

Drive Your Bike teaches students “smart cycling” and defensive riding to become safe, confident, and independent bikers on streets. The two classes include a fun and interactive PowerPoint GAMESHOW that teaches safety measures and the laws for sharing the road with motorists and an outdoor class with bikes to reinforce maneuvers and proficiency to safely operate their device on the street. An optional, Instructor-led Field Trip where skills are put to use, may be arranged after school upon request.

LEVEL TWO

Drive Your Bike is an advance course on “Drivers Education” where students will learn vehicle traffic codes and best practices for driving their bikes predictably and safely to avoid collisions. The two classes include interactive discussions on riding responsibly and visibly, and includes how to confidently and legally “take the lane” for making turns, and an outdoor advance class with bikes to practice the skills necessary for safely maneuvering in traffic. An optional, Instructor-led Field Trip where skills are put to use, may be arranged after school upon request.
