

REED SCHOOL DISTRICT ISSUES LIST

Priorty	Zone	Location	Issue	Suggestion	Submitted by	Submission Date	Who	Status
	corridor	All along Tiburon Blvd.	Flashing speed limit signs are the highest priority. The schools have different bell schedules; vehicle drivers are not aware when students are present	Flashing speed limit signs				
		Avenida Miraflores	The speed limit goes from 25 to 45 back to 45					
		Avenida Miraflores	crossing distance/visability					
		Cecilia Way	no safe crossing There are no traffic lights there. No crossing guards. The light sequence is so off there as traffic rushes in both directions; then comes fast from the right, fast from the left and there is literally no gap to cross over the highway to the bike path at Greenwood Cove to Blackie's. A traffic light is needed and a paved little feeder path.					
		Gilman	vehicle drivers making a right turn are challenged to see pedestrian and cyclists. The vegetation is overgrown and the sidewalk is very narrow making it dangerous for students to collect while waiting to cross Tiburon Blvd.					
		Marwest	there is a good amount of traffic at this intersection, causing confusion for student crossing	Bulb out				
		Neds Way	floods causing cyclists and pedestrians to go into the road way to avoid the flooding- very dangerous for students crossing to the school.					
		Reed Ranch Road	students cross Tiburon Blvd; there is no formal way to cross the road, they must travel down to Trestle Glen to cross					
		Reed Ranch Road	the median pokes out into Tiburon Blvd; cyclists cannot cut through the median- a bike lane is needed in both directions. Students tend to pick-up their bikes adding to a dangerous crossing					
		San Rafael Ave.	approaching Tiburon Blvd; the gravel and dirt pose unsafe conditions for students- no place to stand to cross					

		Trestle Glen	Road markings have faded and there are many potholes					
		Trestle Glen	Tiburon Blvd (inbound/bayside of road) students are cycling on the wrong side of the road. Years ago Caltrans removed a wooden bridge that was used by the students.					
		Trestle Glen	not a safe crossing area. The guard timing could be extended after school there as many kids hang with friends and then head to spring sports.
